General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Effective with the July 1946 issue of this report, country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "0th Cty" (Other Countries). In the case of commodities reported in two units of quantity, transactions from all countries are grouped for the second quantity.

Shipping weight of containers is included with shipping weight of contents if imported filled (e.g., Schedule A Numbers 4208000, 4208200, 6115000, 6116000, 9920500).

Note.—NT - No Transactions.

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Effective with the July 1946 issue of this report, country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "Oth Cty" (Other Countries). In the case of commodities reported in two units of quantity, transactions from all countries are grouped for the second quantity.

Shipping weight of containers is included with shipping weight of contents if imported filled (e.g., Schedule A Numbers 4208000, 4208200, 6115000, 6116000, 9920500).

Note.—NT - No Transactions.

Monthly, beginning with figures for January 1947	.30
Per section	.10
Yearly subscription, including monthly and calendar year statistics	3.50
Per section	1.25

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Effective with the July 1946 issue of this report, country detail within each commodity is limited to those countries from which the value of imports for the month was $500 or over. Transactions for all countries from which import values were less than $500 are grouped within each commodity and shown as "Oth Cty" (Other Countries). In the case of commodities reported in two units of quantity, transactions from all countries are grouped for the second quantity.

Shipping weight of ores and metals of two or more components is included with commodity containing major component of metal (e.g., Schedule A Numbers 6404100, 6405100, 6503000, 6557000). Shipping weight of containers is included with shipping weight of contents if imported filled (e.g., Schedule A Numbers 4208000, 4208200, 6115000, 6116000, 9920500).

Note.—NT - No Transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

1/ The shipping weight may include that of minor components of the ore when this ore is composed of two or more components. In such event, these minor components are reported under their respective commodity numbers without a shipping weight. Wherever the shipping weight for the ore from a given country is less than the gross weight of the ore, there may have been transactions fully reflected in the gross weight totals but for which the shipping weight has been assigned only to the chief component of the transactions.

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.

IMPORT STATISTICS
William C. George

REPORT NO. FT 110

General imports include the following types of transactions:

(a) Immediate consumption entries:

(1) Commodities which, upon arrival, enter immediately into domestic merchandising or consumption channels.

(2) For statistical purposes, commodities such as wheat and petroleum products entered directly into bonded manufacturing warehouses for further processing to be subsequently withdrawn for exportation are included with immediate consumption entries.

(b) Warehouse entries:

(1) Commodities entered into bonded storage warehouses.

(2) Imported ores and crude metals such as copper, lead, and zinc entered into bonded smelting and refining warehouses are included with warehouse entries.

A complete discussion of the compilation procedures and coverage for import statistics will be found in the foreword to the 1944 edition of Foreign Commerce and Navigation of the United States. Copies of the foreword are obtainable upon request.

Commodity descriptions and country names are abbreviated in this report where space does not permit complete description. See Schedule A, Statistical Classification of Imports Into the United States, for complete commodity descriptions and Schedule C, Code Classification of Countries (published as a part of Schedule A), for unabbreviated country names. A separate edition of Schedule C showing the countries, adjacent provinces, territories, and islands included under each country designation is also available.

The omission of a commodity classification or country name from this report indicates no transactions for that commodity or country.

Statistics of general imports of merchandise not shown in this section will be found in other sections of this report according to Schedule A commodity group.
